Introduction

- ▶ KL ONBOARDING is an app built to help internal stakeholders with the onboarding process of employees to the various projects and keep a track of it.
- ▶ Onboarding management is deemed extremely important for every project manager and team because it allows them to keep a close eye on their priorities and become more productive each day.
- ▶ With the right project management app, it's easier to set priorities, explore the art of delegation, communicate directly on tasks, track task progress in real-time, and stay on top of routine work.

Purpose

- ▶ Currently the entire onboarding process is done manually using the excel sheets which is a time consuming process.
- ▶ As the company grows it would become difficult to manage the entire process manually using excel sheets .
- ▶ Main purpose of this application is to make this process much easier for the stakeholders.

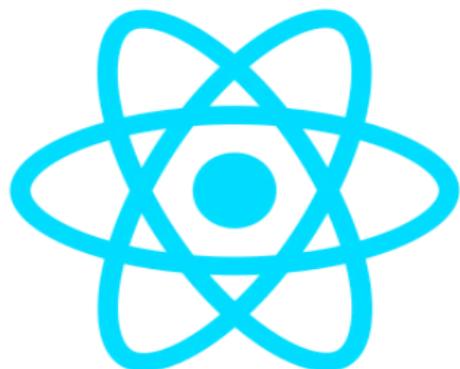

Features and Functions

- ▶ ensure effective task management .
- ▶ There is a separate login credentials for admin and project managers to logging into the application.
- ▶ keep work organized .
- ▶ make review and approval process faster and more collaborative.
- ▶ Get clear insights with dynamic reports
- ▶ providing Gantt charts to provide a visual timeline for task
